

Tennis Club Off To A Good Start For A Banner Season

A merry time made up for the fewness of dancers at the Tennis Club dance Friday evening last. The 5-piece Carstairs orchestra proved a popular quintette. The crowd was not large but a more enjoyable dance could not be wished for. The Club is now well under way. The first games of the season were played on the one court ready Saturday evening. The second clay court will be ready this Saturday. Those contemplating joining will please signify their intention to the secretary, E. C. Fletcher at the Pioneer Office, Phone 12.

It is hoped a proper schedule may be drawn up at an early date. Players will complete one set only when others are waiting to play. It cannot be too strongly emphasized that players wear canvas running shoes while on the courts. Co-operation in such details is asked of all.

Miss Helen Shantz of Calgary is visiting with Misses Lucille and Laura Smith this week.

Mr. R. P. Emery, Provincial Scale Inspector was in town on Tuesday giving the local scales the once over.

Mr. Chas. Ratcliffe of Kimberley B. C. is a visitor at the home of Mr. and Mrs. M. B. Clemens this week.

ANNUAL AGRICULTURAL STATISTICS, 1929

OTTAWA.—The Dominion Bureau of Statistics has made the customary arrangements for the collection and publication of the annual agricultural statistics of Canada for the year 1929. These statistics will be based upon returns collected next June from individual farmers upon cardboard schedules issued to them through the teachers and children of the rural schools, as well as from farmers direct, which will be circulated on an increased scale this year. The schedule is a very simple one, calling only for the areas sown to field crops and the numbers of farm animals alive on the farm in mid-June. Upon the resulting estimates of total areas sown are based the preliminary, provisional and final estimates of yield, which are of supreme importance in connection with the movement, financing, distribution and sale of the principal cereals, especially of wheat, of which Canada is now the world's leading exporter.

The present plans for the collection of these statistics have been followed annually since 1917, and the estimates based thereon have come to be confidently relied upon by all interested in the production and distribution of Canadian grain.

Accurate statistics are indispensable for a proper appreciation of the national progress, and in order to ensure that the statistics may be as accurate as possible, it is earnestly hoped that farmers throughout the Dominion will not fail to render the small service required by filling up and returning the schedule issued.

If any farmer should not receive the cardboard schedule by the middle of June he should apply for same either

RECEIVES L.L.D. DEGREE

The University of Alberta has conferred the degree of Doctor of Laws (honoris causa) on Mr. H. W. Wood, president of the United Farmers of Alberta. There will be general agreement that the honor has been well earned. As leader of the great farm organization in this province Mr. Wood has performed valuable service and he has given sane and virile leadership to the pool movement.

to the school teacher of the nearest local rural school, or to his Provincial Department of Agriculture; or to the Dominion Statistician at Ottawa. The aim is to obtain a completed schedule from every farmer, as the more numerous the returns, the more trustworthy will be the resulting estimates.

WHY NOT PLAY FAIR WITH OTHER DRIVERS

A correspondent from Royal Park writes the Observer as follows:

Did you ever stop to think what the dimmers were put on your car for? If so, why don't you use them?

About 75% of the car drivers in Vegreville and the neighboring towns and districts will pass other cars at night with glaring lights at a speed of 30 miles an hour. It takes only a touch of the finger or foot (depending on the car one is driving), to tilt the lights and one has exactly as good a light bright or dim, only tilted so that it does not affect the other driver's eyes. No more current is consumed in changing lights from bright to dim.

Yet most drivers sit behind the wheel like a block of wood and curse the other man, without trying to give him a lead in dimming the lights, off and on, in the hope that he may be decent enough to do the same.

Drivers can use both their heads and their dimmers and if you are reasonably courteous, your neighbor will be the same. A few nights ago I was coming from Lavoie to Vegreville and met 40 cars on the way. I put on the dimmer for every car I met but not a single driver did the same for me. From Vegreville to Mundare, I met 46 cars and put on the dimmer for all of them and only two responded. Those two drivers were real gentlemen; the others, you can place for yourself. We all appreciate these little courtesies, so why not extend them to others?

The other night, I met 6 cars in quick succession and I had to stop until they passed, owing to the glare lights. My eyesight is perfectly good but I take no chances of running into the ditch in cases like that. In my opinion the A.P.P. might be more active in checking up glare lights. In the cities like Edmonton, one gets into trouble at once with the police if he goes ahead with glare lights; not because the citizens are any better than ours, but because they have either paid fines or used their heads to avoid paying them. I suggest to the A.P.P. that they watch these reckless speed and light artists and make an example of a few of them.

Play safe; slow up and use your dimmer at night.—Ex.

The above applies equally well to Didsbury district.

WEDDINGS

LUNT—JAMES

A wedding of interesting to many in the community was solemnized in the presence of relatives and friends, on Wednesday, May 15th, at nine p. m., at the home of Mr. and Mrs. Cecil Adstead, when the latter's brother, Percy E. Lunt was united in marriage to Jeanette Adela James, daughter of Mr. and

Didsbury Loses To Carstairs And Crossfield In Opening Series

Carstairs 9; Didsbury 4

The Didsbury baseball team opened its series of Rosebud league games with a six inning encounter against Carstairs, Friday evening last, before a fair crowd of supporters.

Excellent fielding was in evidence on occasions. A few errors crept in, which from a spectator's angle, might have been avoided. Didsbury's batting was either weak, else the Carstairs' pitchers Matheson's and D'Arcy's were dead on, however, this department will improve with more workouts.

Jimmy Devolin, for Didsbury, with some fine pitching, held the visitors to three runs up to the second last inning, in which Carstairs scored four runs with two in the last, all made on errors.

The local boys missed their chance in the fifth inning, with bases full and nobody out. The next three batters hit the breeze and were fanned out, a sad blow to the fans.

The batting order of the teams: Didsbury: Wynan, Cook, George, Studer, Russell, Pettit, Michael, Wilson, Devolin.

Carstairs: Ing, Matheson, Weber, Wiggins, D'Arcy, Liesemer, Durant, Jamieson, Pearson.

Crossfield 17; Didsbury 5

In a seven inning encounter on Monday evening the local baseball nine went down to defeat at the hands of Crossfield. The visitors started a regular merry-go-round in the first inning crossing the home plate 11 times. Lee Russell commenced the hurling for Didsbury but was relieved by the old reliable Jim Devolin in the latter part of the first inning. After the first inning fairly good ball was played, the local boys scoring five runs and Crossfield six.

Cecil Studer relieved Jimmy Devolin in the sixth inning. Cecil allowed only six men to face him in two innings.

The next game on the local diamond takes place next Wednesday evening, 29th against Red Deer.

Mrs. Dunham James of Calgary.

Rev. A. E. Hayes officiated. Following the ceremony a buffet supper was served, after which the evening was spent in dancing. The happy couple left early Thursday morning on a motor trip to Wynand, B. C. and other western points where the honeymoon will be spent. Upon their return they will reside in Didsbury.

Canvas Footwear

A complete range of outing shoes, the best on the market in quality, appearance and durability.

Outstanding Features

The sole construction on the new footwear eliminates all possibility of the foxing separating from the sole. Exceptional cushioning, gridding and long-wearing qualities assure the wearer of unusual foot comfort and lightness in weight. Last and best of all our prices this season are lower than ever.

MEN'S Brown Canvas Shoes, tan rubber foxing and toe cap. "New Tuff" Sole \$1.10

Oxfords..... 95c

BOYS' Brown Canvas Shoes. Same as above. Sizes 1 to 5..... 95c

More Highway Construction Plans

Tenders have been called and will be opened on May 22, for the second lot of road grading contracts to be awarded in connection with the Alberta Government's 1929 program of highway construction and improvement. Included in the projects are a 25 mile section of the Edmonton - Evansburg road from Blueberry Corner to Seba Corner, 10 miles from the Calgary-Edmonton highway west to Sylvan Lake, 26 miles on the Pincher-Waterton Lake road and, 12 miles from Irvine to the eastern boundary of the province. A further list of contracts is under preparation at the present time and announcement in this connection will be made shortly.

Final Taxis Meeting At Mentor's Home

The last meeting of the season of the local Taxis boys group was held at the home of their mentor, Mr. J. Boorman, Monday evening last. Quite a discussion took place in the intellectual period on the boys own opinions. "Why they should attend Church and Sunday School. Plans for the proposed trip to Fallen Timber creek on Empire Day were dropped, owing to the inability to obtain transportation. School examination time is approaching and the square decided to discontinue further meetings and reorganize again the first part of September. At the close of the meeting a hearty vote of thanks was passed to Mrs. Boorman, who served the square refreshments, also to the mentor for his work and interest in and among the boys.

Miss Zetta M. Liesemer, sister of Messrs. Geo. and W. G. Liesemer and Mrs. J. V. Berscht was quietly married on May 11 at the Presbyterian Church, Reno, Nev., to Mr. Chas. Hall of San Luis Obispo, Cal. The bride was a teacher in Didsbury a few years ago.

Science in Service of Mankind

When the real story of human progress is told, probably the salient contribution credited to the present generation will be the alliance of science with pursuits of peace and the mobilization of scientific minds for the common good.

This generation, more than any previous generation in human history perhaps, has effected a divorcement of science from war. In the past, the best scientific minds were directed to the chemistry and physics of warfare, industry and commerce for the most part having to content themselves with the second-best or rely upon adaptation of some invention or process originally devoted to war.

That is a broad generalization which, in the specific case may not be true, but which, in the main, can be substantiated; and the fact remains that war has been the great stimulus to scientific research and invention and, until the present generation, a greater stimulus than industry, commerce and the pursuits of peace. It might also be said that science in its first alliance with industry and commerce had a background of war—of economic war. Now, however, the science laboratory is a workshop, in the true sense of the word.

Illustrative of this idea is the little country of Denmark, where agriculture has reached a scientific plane higher than in any other country. The great stimulus to scientific agriculture in Denmark was war. Following the war with Germany, in which Denmark lost the provinces of Schleswig and Holstein, the Danes turned their attention to the intensive cultivation of their very limited resources recognizing that, only by high commercial development of these resources, could they hope to survive as a people, and Denmark as a nation. That they have succeeded is proved by the fact that agricultural countries now look to Denmark for leadership and guidance in certain advanced phases of agriculture.

The aeroplane, too, now occupying a supremely important role in the development of Canada's remoter areas and great mineral-bearing zones, and serving to "devour distances" which hitherto occupied weeks, sometimes months, of arduous and hazardous travel, made its greatest advancement during the hectic days of the World War. There was less material difference between the original Wright aeroplane, or the plane in which Bleriot first crossed the English Channel, and the planes used in the early days of the war, than between the planes of 1914 and those which patrolled the front areas in the days immediately preceding the Armistice. That process of development which gathered so much impetus throughout the war, has been carried into this post-war period, a fact which is abundantly manifest.

The World War saw a general mobilization of science not only in Germany where, for some years previously, industrial research had been encouraged in that country's efforts to wage successful economic war against its rival neighbors, but also in and throughout the British Empire and the United States. There was no demobilization of the forces of science after the war in these countries. There was imperative need of retaining the best scientific minds available in the work of reconstruction and of meeting competition in world trade. Science thus has come into its own.

Canada came late into the movement, but having entered, is now displaying the energy and enthusiasm characteristic of its youth and growing power. With agriculture as the basic industry of the country, it is natural that the mobilization of science in Canada should be directed in large measure to the advancement of that industry. Within this movement, the chemist has turned his attention to the milling qualities of wheat. The biologist is studying the theory of breeding crosses of the different kinds of wheat, the causes and remedies of plant diseases, the insect pests and their control. The physicist has begun to investigate soil temperatures and the engineer to consider power problems, water supply and waste in farm houses. The economists have concentrated on marketing problems, and so on.

Noteworthy already have been the achievements of the scientists at work in the Dominion Rust Research Laboratory, at Winnipeg. The progress already made toward the production of a rust-resistant wheat that will meet requirements as to milling and yield, have been so impressive as to presage an epoch-marking development in the near future.

Canada's Largest Organ

Installation of the Royal York Hotel Casavant organ, the largest in the Dominion, has begun after months of preparation made for it. It was made in the world-famous workshops at St. Hyacinthe, Quebec, and its parts conveyed to Toronto in five railway cars.

Canadian Graphite

Canadian graphite is marketed as refined flake, the product of concentration of disseminated ore. The mines and mills are situated in the Perth, Bancroft and Calabogie districts in Ontario, and in the Buckingham, Guenette, and St. Remi districts in Quebec.

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

A Big Business

Postal Department In Canada
Handles Millions Every Year

Rural routes have been extended and the inauguration of the air mail service has made it possible to deliver mail in the winter time to many isolated spots which have never before received mail during that season; thus bringing comfort to the people of the Magdalen Islands, the north shore of the St. Lawrence River, northern sections throughout the Mackenzie River district, Cold Lake, Flin Flon and north to the Yukon. The postal department has some 38,750 employees in the Dominion of Canada. Of these, between 12,000 and 13,000 are postmasters. The department handles resources of revenue somewhere in the neighborhood of \$50,000,000, approximately \$50 for every person in Canada in one year.

DO YOU VALUE HEALTH?

Sickness Almost Always Due To
Weak, Watery Blood

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches or backaches; if there are touches of indigestion, or twinges of rheumatism, you may depend upon it that these symptoms come from an impoverished condition of the blood, and that unless this condition is remedied a complete breakdown may follow. To any who are in this condition, Dr. Williams' Pink Pills will be found the perfect medicine. The whole mission of this medicine is to build up the blood, promote appetite and good digestion, and strengthen tired, frayed nerves. Men and women alike benefit through the use of this medicine. Therefore if you are weak or ailing, give Dr. Williams' Pink Pills a fair trial and you will be pleased with the beneficial results that will speedily follow.

Among the thousands who have found Dr. Williams' Pink Pills a real blessing is Mrs. Geo. M. Andrews, Halifax, N.S., who says:—"My first experience with Dr. Williams' Pink Pills was as an anaemic young girl, when they completely restored my health. Then a few years ago I became pale and run down, and my husband got a supply of the pills for me. I gave them a good trial and when my baby was born she was a big healthy baby and I did not have a day's sickness. My friends all tell me how well I look and I certainly feel that way, and I give all the credit to Dr. Williams' Pink Pills. I hope my experience will help some other woman who needs a good medicine."

You can get the pills from your druggist, or by mail at 50 cents a box from The Williams' Medicine Co., Brockville, Ont.

A leading authority on steel has stated that the world loses \$2,500,000,000 yearly due to the corrosion of steel.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the forms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Melting of the Antarctic ice cap, according to an Australian scientist, would raise the levels of the oceans by fifty feet.

Cheapest Of All Oils.—Considering the qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Women Archaeologists

This archaeological season in Palestine shows a new feature of social interest. For the first time archaeological excavations are being carried on by a staff of women. This plan has been initiated by the British School of Archaeology, Jerusalem, which sent a party consisting of Miss Garrod, Miss Eubank, of Cambridge; Miss Kitson Clark, of Oxford, and one American woman to continue the work near Athlit, South Haifa. The direction is in charge of Miss Garrod.

The Wonders Of Chemistry

Will Be Used To Build and Change
Character Is Prediction

The American Chemical Society, meeting at Columbus, Ohio, held out a few alluring prospects for the future.

For instance, the time may be coming when a man won't have to build his own character, but can depend on chemistry to do it for him.

Then persons owing cows, if they're fortunate enough to have a little woodland, will have the cow-food problem solved for all time because cows will eat wood.

Wood, chemically treated, is already being used for cow-fodder in some countries, according to C. L. Esselen, Boston chemical engineer, who addressed the society.

Dr. J. S. Matthews, of the University of Wisconsin, predicted that chemistry would be used to change and build character and in this connection he believes the insane will be made well and that the seasoned criminal will become a law-abiding citizen.

Future generations may be giants, one chemist said, if scientists can discover, by synthesis, the cause of growth which lies hidden in the cell nuclei. The discovery, he said he believed, would hinge upon the balance of atoms.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

The prairie provinces with manufactured products during last year valued at \$327,000,000 begin to have tall chimneys of their own.

Many a man learns to shift for himself when he buys his first car.

Origin Of National Anthem

Is One Musical Mystery Nobody Has
Solved Yet

The origin of the British National Anthem is a musical mystery which has never been solved. It is known that it was first sung in public at Drury Lane and Covent Garden in 1745, when the news of the defeat of Sir John Cope's army at Prestonpas reached London. But it was written a few years earlier than this. One thing students of the subject are fairly sure about is that it was written as a national prayer for the safety of George II. against the Jacobites, and the version given in the "Gentleman's Magazine" in 1745, makes it peculiarly applicable to the fervent prayer of today, though for a very different reason.

Could Hardly Live For Asthma. writes one man who after years of suffering, has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

Altitude Of Banff

Banff, the headquarters of Banff national park, Alberta, has an altitude of 4,538 feet above sea level and enjoys a climate which is in many respects, ideal. The air is exceedingly pure and has a most exhilarating effect.

Highly Interesting Developments Are Expected In Canada As A Result Of Fuel Research Work

Fuel research may not sound like an entrancing subject, but to materially increase the wealth which Canada will receive from her enormous coal deposits through the scientific and most economic use of the coal is something that does make an appeal. The successful coking of coal means an improved fuel product and less dependence on imported fuel. Our coal deposits are the potential source of an unlimited supply of crude oil, in case the crude oil from wells, though now rapidly increasing, may not always be plentiful. The uses of gas made from coal are also increasing.

These and other matters are dealt with by R. E. Gilmore, superintendent of the Fuel Research laboratories of the Mines branch at Ottawa, in the bulletin of the Professional Institute of the Civil Service. The problem of coking, he says, is not merely one of finding the way to coke different Canadian coals but of finding the coals which will produce a coke that is equal in every way to the best that is imported.

Coke is now produced in Canada mostly by high temperature carbonization. That is, the coal is brought to a large centre where there is a good market for the gas that is driven off during the process. But low temperature carbonization, which does not involve disposal of the gas and can therefore take place at the mine, promises a greater utilization of Canadian coal, according to Mr. Gilmore. But low temperature processes differ in detail for different varieties of coal, and this provides plenty of room for research.

Highly interesting developments are evidently possible in the use of gas made from coal. Mr. Gilmore says: "More and more city houses are being heated with it. We have refrigerators operated by gas as well as electricity so that it is now possible to produce both heat and cold in the same room from the city gas supply. Gasoline can be made synthetically from coal and gas and imagine, if you will, the possibilities of the development of a process on a small unit scale so that synthetic motor fuels may be produced in private homes and other buildings served with gas. Future developments along this line may make it possible to obtain the motor fuel supply for the family car from the city gas supply, thus converting private garages into private filling stations."

Besides the coke, oil and gas, many other valuable by-products can be taken from coal. The possibilities of fuel research are indeed wonderful. Some of the benefits should be obtained very soon, and others will be a matter of the future. The coal resources will mean very much more to the country if their value can be enhanced, as is suggested by the use of scientific methods. Free Press.

Alberta Turkeys

According to a booklet issued by the Provincial Government's Department of Agriculture, during the year 1928, some 1,350,000 lbs. of Alberta turkeys were disposed of outside the province, although ten years ago it was necessary to import large supplies from Eastern Canada. Now, there is a large surplus for shipment to Eastern Canada.

Adventures Remembered

Tablet Erected In London To Memory Of Early American Settlers

A handsome bronze tablet was recently placed in a prominent position at Brunswick Wharf, Blackwall, London, to the memory of 105 "Adventurers" who set sail from that spot on December 19, 1606, to found the first permanent English colony in America.

Three ships comprised the expedition, the largest, as recorded on the tablet being the "Sarah Constant," of 100 tons. The remaining two, the "Goodspeed" and the "Discovery," were respectively 40 tons and 20 tons.

On May 13, the adventurers settled where now is Jamestown, Virginia, but owing to the climatic conditions, lack of food, and the hostility of the Indians, 63 of the original 105 died during the first seven months. The handful of survivors, however, carried on, and 15 years later the little colony numbered 5,000 souls.

Tiniest Tagger Is Red Cross Champion

Charming little Lenore Moir, of Edmonton, Alberta, had the distinction of raising most money for the Junior Red Cross Crippled Children's Hospital when the Annual Primrose Tag Day was held in the city. Twenty-five thousand beautiful primroses were made in April by the children in the city, and offered for sale by hundreds of taggers, young and old. Of these Lenore in her Red Cross uniform attracted much attention, and the "Little Nurse" had the honour of turning in the best box of money and winning first prize.

One thousand dollars were collected for the crippled children of Alberta, on an April morning when the streets of the city were transformed to a garden of primroses that is forever England.

Planes For Flying Clubs

Government To Present Ten New Planes To Encourage Flying

Ten aeroplanes are to be given by the government to flying clubs already in operation. These are to duplicate purchases made in 1928 by the following clubs: Montreal, Ottawa, Hamilton, Toronto, Winnipeg, Regina, Moose Jaw, Granby, Quebec, Saskatoon and Calgary.

The grants are made in furtherance of a policy formulated in 1927 to encourage flying in Canada. There are at present attached to the clubs 112 holders of private licenses and 45 commercial. Total membership is 3,100 with 260 members flying solo.

Value Of Personal Contact Is Daily Demonstrated At League Of Nations Gatherings

Summer Fallow

Treatment For Wheat

Weeds Should Be Destroyed As Soon As Possible After Germination

The most important item in summer fallowing is to germinate weed seeds and destroy the weeds before they have consumed any appreciable amount of moisture. This is the view held by the superintendent of the Swift Current experimental station, after five years work in treating summer fallow in different ways. Fall ploughing has not proved a help. Indeed it has given lower average yields than any other treatment. Cultivation only during the fallow year gave the best average results for five years, amounting to 26.4 bushels of wheat the year following as compared with 22.9 bushels when the land was fall ploughed previous to the fallow year and cultivated the following season. Discussing this question in his report for 1928, published by the Department of Agriculture, at Ottawa, Mr. J. G. Taggart, the superintendent, calls attention to the importance of leaving the soil in the fall in a condition that will not promote soil drifting.

Export Wheat To 47 Countries

British Isles the Principal Buyer For Canada's Supplies

Value of exports of wheat from Canada for the first eight months of the current crop year ended March 31, 1929, totalled \$302,277,524, an increase of about \$50,000,000 over the corresponding period in the previous year. The British Isles was the principal buyer, taking \$174,141,325 worth. Wheat from Canada is exported to 47 countries of the world.

Total wheat flour exports for the eight months under review were valued at \$46,314,230 as compared with \$43,487,802 for the corresponding period of the preceding year. Of this amount the British Isles took \$10,965,857, and other countries took \$35,348,792.

"That man must know all about the stock exchange."

"What makes you think so?"

"He never speculates."

SCENE OF R.C.G.A. AMATEUR

No. 1 Hole—385 yards, Par 4.

Jasper, Alberta, will be the venue of the Canadian Amateur Championships of the Royal Canadian Golf Association, August 10th to 24th, this year. The Jasper Park Lodge course par of 72 has not yet been made by an amateur player, and many reputations are likely to be shattered in the tournament this summer. It is expected that the course, which has been described by experts as the finest on the continent, will attract many of the outstanding players of North America.

The photograph shows the first hole of the Jasper Park Lodge course as seen from the tee. Below is a plan of the first hole with the yardages to scale marked below it. Practically every hole has three tees, but in the amateur championships all play will be from tee No. 1.

Co-incident with the Canadian Amateur Tournament, the Western Canada Amateur will also be played over the Jasper Park Lodge course.

Anyone who has visited Geneva, the home of the League of Nations, has been impressed above all with the friendly spirit which seems to prevail in this world meeting place. No greater indication of the value of personal contact between the representatives of different peoples can be found than in Geneva. There, even that great bugaboo, the color line, seems to be forgotten, and white, brown and black, mingle on terms of apparent social and international equality.

Senator Dandurand has said that if the League did nothing more than gather together the representatives of 54 nations for a friendly and commonsense discussion of their differences it more than justified its existence. More and more each year this is brought home to the visitor and today this lovely old town on the loveliest lake in the world is the friendliest and most cosmopolitan spot in Christendom.

Geneva has lived up a lot since the early days of the League. Then there were only council meetings and the annual assembly. But now the League besides trying to settle questions of peace and war has got very busy on other humanitarian issues which in the aggregate help nations to understand one another. Every week delegates and experts from all the countries of the world turn up to debate under League auspices such subjects as calendar reform, the opium and white slave traffic, international trade barriers and the betterment of the position of working classes.

At assembly time, of course, Geneva is filled to bursting point with people of every race and colour. You hear samples of most of the languages on earth, and the points of view of every race and nation. The Great Hall of the League building gets so full of delegates that a few members of the public can barely squeeze in. There is an enormous confusion of delegates, experts, visitors, and "big guns." But somehow things get done. Those efficient fellows on the secretariat sort things out and transmit decisions and enquiries to seats of government all over the planet.

More interesting than the League's official halls are the hotels where the men who matter get together over dinner and lunch tables to grind axes, exchange views, reach understandings. You see the orator, Vismari, the very black delegate from Haiti trying his French on the bland yellow representative of China, "Ranjit" who is so often at Geneva on India's behalf, trying over a friendly dinner table to get Prince Charoon, the Persian delegate, to come round to his point of view about opium growing in Persia.

Truly, everyone who goes to Europe should visit Geneva. There they will see in being the beginnings of the first practical effort to bring universal peace into the world and they cannot but be impressed with the fact that those who assemble there are going about the job in a whole-hearted and businesslike manner.

Barbara: "I was out with young Driscoll last evening."

Muriel: "Was he shy?"

Barbara: "He is now—fifty bucks!"

"When I died on the stage, the people wept for emotion."

"Yes, because they knew you were not really dead."—Esquella, Barcelona.

Legal, government, and municipal advertising, 16 cents per line first insertion and 12 cents per line (unchanged) each subsequent insertion. Local readers ten cents per line.

Classified Advertising: For Sale, Articles Wanted, Lost, Stolen, or Strayed, etc., 10 cents a line first insertion, (count six words to the line), and 5 cents a line each subsequent insertion (unchanged). Business Cards, special rate of \$1.00 per month (1 inch) or \$11.00 per year if paid in advance.

Notices under Coming Events, 10 cents per line first insertion, minimum 50 cents, 25 cents each subsequent insertion.

Card of Thanks (not exceeding six lines) 50 cents per insertion.

Obituary poetry 10 cents per line.

Transient advertisements to be paid for when ordered.

Display advertising rates on application at the office.

Changes of advertisements must reach the office not later than noon Tuesday to ensure insertion in the issue of that week.

E.J.C. GOODER, Editor & Manager.

SOMEBODY PAYS FOR IT

Every line in a newspaper costs the proprietor something. If it is for the benefit of an individual or an organization it should be paid for. Nearly every week we are requested for a few lines of advertising of some event or other, and yet we are expected to pay our way for anything we attend or buy. If the grocer were asked to contribute groceries to one abundantly able to pay for them, he would refuse. The proprietor of a newspaper must pay for the free advertising if the beneficiary does not, and yet it is one of the hardest things to be learned by many that a newspaper has space in its columns to rent and must rent this space to live. To give away rent for anything less than living rates is as fatal to a newspaper as for a landlord to furnish rent free.

—The Armstrong Advertiser.

HELP OF ALL NEEDED

Every citizen interested in the future of Didsbury dreams of the time when it will be a bigger and better community. He wants it to have more fine homes and more stores.

These are commendable hopes but they accomplish nothing unless they inspire efforts aimed at fulfillment. Castles in the air are beautiful to dream about, but a "dream city" is not what progressive citizens have in mind.

To make Didsbury a bigger and better town its people must do something besides dream about it. The booster must do more than talk about the wonders of his town, and others must do more than talk about co-operation.

A community grows when the great body of its citizens concentrates its mental and physical efforts and financial resources on this one idea of making it grow in size and prosperity.

There is a need for outside talent and capital, but Didsbury has not begun to tap its own resources in individual talent and capital. Men and money can be found to make existing industries and business enterprises larger and sounder and to exploit as yet untapped natural resources and advantages of the community. Local enterprise, talent and ability and local investment are the soundest and most lasting foundations upon which substantial growth of the city depends.

Build Didsbury by encouraging home industry, by praising and patronizing local business, by promoting real estate development, by improving employment conditions, by investing capital here.

ADVERTISING AS A SCIENCE

Like all things, advertising has had an evolution. A century ago the leading merchants resorted to what is now the classified ad and the modern display ad was unknown. The store which a century ago purchased newspaper advertising in quantities of a half dozen lines weekly now contracts for one and two pages and the landlady advertising for a roomer or a young lady seeking a lost cat consumes more space in the newspaper of today than the most thriving merchant of yesterday.

As in quantity, so has advertising had an evolution of quality. Within the shopping memory of the present

generation the advertisement, both newspaper and magazine, has risen from a relation of articles and prices to attractive displays artistically phrased, graphically illustrated and in the case of magazines often beautifully lithographed. The modern advertisement is not a narration of goods and prices; it is a storehouse of information about buying, styles, thrift and economy.

The public once complained of spending a penny for a newspaper and getting 50 per cent., more or less, of its paper in advertising. Now magazines are purchased by many for their advertisements alone, and as for the newspaper, the advertisements form an important part of the day's reading.

According to the Advocate, Red Deer, between 30 and 40 members of the Edmonton Board of Trade are planning to visit Red Deer on the afternoon and evening of Tuesday, May 28. This visit is part of the plan of the Edmonton Board of Trade members to visit all the towns in Central and Northern Alberta that they possibly can during the year.

HIGH SCHOOL TEAMS PLAY AT INNISFAIL

On Tuesday last the school baseball and basketball teams journeyed to Innisfail and were successful in winning the basketball game 26-17 but losing the baseball 3-6.

The local girls had a dead edge on the Innisfail basketballers and according to the play should have won by a greater margin. Dorothy Rear, Holly Hunsperger, Marvel Sheils, Alda Shantz, Alice Pearson, and Margaret Geiger represented the local school.

Ivan Sutherland performed on the mound for the baseball team and was opposed by Miller, formerly of Didsbury. The local boys were particularly weak in batting and the game ended 6-3 in Innisfail's favor.

These games are in connection with the annual sports meet to be held this fall. Points will be awarded for 1st, second and third position in each section. The next game takes place on Thursday when the local boys play Crossfield. A win for the baseball team there will give them a tie for first place.

The teams wish to thank all who made the trip to Innisfail possible by providing automobiles.

Mr. and Mrs. O. R. Swingle left this week for the west coast.

Miss Marion Leeson left on Saturday for Moose Jaw to commence her duties as Chautauqua director.

C.P.R. Branch Lines

Heavy Programme Of Extension For the Season Of 1929

Under its policy of development and expansion, the Canadian Pacific Railway has already this season let contracts for 286 miles of branch lines construction in Western Canada, according to D. C. Coleman, vice-president, western lines. This figure was reached following the announcement of four additional contracts totalling 112 miles, and it is expected that when the contracts for the newly authorized Lanigan-Prince Albert branch are let, that the construction programme for the season of 1929 will call for slightly more than 400 miles. Work on these contracts will be commenced immediately.

Contracts announced follow: Nipawin, toward Prince Albert, 25 miles; contractor F. Mannix, of Calgary.

Kootenay-Landing to Proctor, 35 miles; contractor Dutton and Grant, of Winnipeg.

Archive to Wymark branch from Lake Johnson to Wymark, 27 miles; contractors, Riley, Reid and Sandgren, of Edmonton.

Suffield to Blackie, branch from Arrowwood to Blackie, 25 miles; contractor Tomlinson Construction Co., Ltd., of Winnipeg.

Contracts already given this spring and which call for 174 miles of construction follow:

Aerne, northeasterly, 25 miles; contractor, F. Mannix, of Calgary.

Willingdon to Vegreville, 25 miles; Brooks Construction Co., Prince Albert.

Lake Alma, west, 18 miles; contractors, Riley, Reid and Sandgren, Edmonton.

Lloydminster, northeasterly, 25 miles; contractors, Rosa and Wickstrand.

Unwin, westerly, 20 miles; contractors, Rosa and Wickstrand.

Coronation, Youngstown, 41 miles; contractor, F. Mannix, of Calgary.

This company will also proceed with the Lacombe northeasterly, a distance of 20 miles. Stewart & Cameron, of Winnipeg, are the contractors.

In making the announcement Mr. Coleman stated that Royal Assent had recently been received to the legislation authorizing the construction of the branch line from Lanigan to Prince Albert, and that it was proposed to let contracts for this work at the earliest possible moment, and immediately following the acceptance of the plans by the Board of Railway Commissioners, at Ottawa. This line will be 117 miles in length and will form an important link in the western branch line system. The programme, Mr. Coleman said, indicated that the Canadian Pacific Railway was proceeding actively with its projected branch lines and, further, that it was going ahead with its plans for the opening of the northern country. This was particularly emphasized by the letting of the contract to build from Nipawin toward Prince Albert, and by the fact that during the winter the company devoted a great deal of energy to the construction of a combined highway and railroad bridge over the Saskatchewan River at Nipawin. The piers for his bridge are now in place, he stated, and the structure will be completed as soon as possible. The company's keen interest in northern development was further indicated by the announcement that the Lanigan-Prince Albert branch would be proceeded with this season. Another important line was that scheduled from Kootenay Landing to Proctor, in British Columbia. This line when completed will give an all rail southern route to the Pacific Coast. The line, a connecting link, was made necessary by the growth of traffic and will do away with the necessity of using boats on Kootenay Lake. The construction work itself will be one of the most difficult since early construction days in Western Canada as the line will be built through mountainous country. It will be necessary to put in two tunnels, one 400 feet and the other 1,000 feet, and one bridge over the Kootenay Lake at Kootenay Landing which with approaches will be 3,500 feet in length.

The branch lines on the prairies will, he stated, prove of immense value to the agricultural communities and will greatly facilitate the movement of grain to markets and manufactured commodities of the farmers and distributing centres. Negotiations with the Canadian National Railways are proceeding effecting the entrance of the Canadian Pacific Railway to Battleford and North Battleford, and negotiations for an exit for the Canadian Pacific Railway from Prince Albert northwesterly will shortly be undertaken.

Ship Muskrats To England

What is stated to be a record consignment of muskrats in one batch to the Old Country was shipped on April 16th from Lindsay to Southend-on-Sea, England, in the care of the Canadian Pacific Express Company. The rodents are to form the nucleus of another muskrat farm in England, where the industry is thriving under an increasing demand for furs.

Minard's Liniment for cuts and bruises.

Canadian Honored

Medical Council Of London Nominates Ontario Man For Presidency

Donald Armour, M.D., C.M.G., F.R.C.S., a native of Cobourg, Ont., has been signally honored by receiving the unanimous nomination of the council of the Medical Society of London, for the presidency of the body.

Dr. Armour is a son of the late Hon. J. D. Armour, a chief justice of Ontario. His election will mark the first occasion upon which a graduate of an overseas university has held the office of president of the historic British society.

BABY'S OWN TABLETS WIN GREAT PRAISE

Many Mothers Always Keep Them In the House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets, Mrs. Donat Plouffe, Tinguivick, Que., writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Good Lamb Crop

Southern Alberta flock owners are harvesting one of the best lamb crops in years, it was revealed at the annual meeting of the Southern Alberta Sheep Breeders' Association at Lethbridge, Alta., recently.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

How many people do you know who are spending money they have not yet earned for things they don't need to impress people they don't like.

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes:—"I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night. I decided to try

and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Developed Whaling Industry

Success Has Followed Exploration Of Arctic and Antarctic

The life of the arctic explorer and the whaler is one of adventure and also of great hardship. The adventures which are so thrilling when recorded on paper, were very different in actuality.

The value of Arctic and Antarctic exploration has often been questioned by the lay mind, when expeditions have ended in disaster and valuable lives have been sacrificed.

But the most striking example of the enormous value of Antarctic exploration is to be found in the development of the whale fisheries, which owe their inception to the enterprises of Captain Carl Larsen, who after various unsuccessful enterprises as far back as 1892 finally succeeded in floating the Argentine Fishing Company, which has been so successful that in some years a dividend of 100 per cent. has been paid.

It was through accompanying the Nordens Kjolds expedition to Graham Land in 1902 that he discovered the possibilities for the exploitation of which he started the fishing company.

Other companies followed, and the industry in the neighborhood of Graham Land now gives employment to several thousand men, including the crews of the whalers and transport vessels and the workers afloat and ashore.

Scottish Farmers Favor Pools

Past Experience In This Line Has Been Encouraging

The value of pools in the marketing of home farm produce was emphasized at the annual general meeting of the Scottish Agricultural Organization Society, in Edinburgh. Major Mark Sprott, of Riddell, after referring to the success of the milk pool and to the progress of the scheme for a national egg pool, said that the foundations of a Scottish national meat pool were now being laid. They proposed that in due course there should be a chain of farmers' slaughter-houses up and down the country, and the first link in it had been forged at Newton St. Boswells.

The experiences of the last five months had been most satisfactory, and they noticed a definite change in the outlook, not only on the part of the producers, but on the part of the distributors, towards this better marketing. The pig trade in Scotland remained as chaotic as ever, but they were going to have these slaughter-houses as clearing-houses for pigs, and he believed that was how the pig trade difficulties were going to be solved. On the subject of a national potato pool, he said he hoped it would not be long before a scheme was evolved.

Minard's Liniment relieves pain.

"Just a Slice Of Ham" But With New Flavor

"They all said they weren't hungry—but look at the platter!" That's how it goes when you cook your slice of ham in Borden's St. Charles Milk, according to the recipe below.

The mustard flavor is cooked in, and there's a suggestion of cloves, too—besides the extra-rich milk which gives every dish a superior savor and nutritive value. Be sure to use St. Charles milk—ordinary milk is too thin.

You'll be surprised how different this dish is from just plain ham.

Baked Ham With St. Charles

- 1 slice ham cut about 1 inch thick, with rim of fat.
- 1 tablespoon sugar.
- 1 cup Borden's St. Charles Milk.
- 1 teaspoon mustard.
- 1 tablespoon flour.
- ½ teaspoon ground cloves.
- ¾ cup water.

Trim off rim of fat and cut in very small pieces. Thoroughly mix flour and mustard and pat into ham. Place in rather deep pan. Mix together cloves and sugar and rub through the fat; place over top of ham. Dilute milk with water and pour over ham to cover. Bake in a moderate oven until ham is tender, about one hour. Add more milk as needed to cover ham while baking.

Minard's Liniment—good for tired feet.

The Ideal Summer Meal

Save the coupons in the carton. Write for Cook Book and Premium List. Connors Bros. Ltd., Black's Harbor, N. B.

LADIES WANTED TO DO PLAIN and light sewing at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars. NATIONAL MANUFACTURING CO., Montreal.

Stiffness

After strenuous activity, a rub down with Minard's Liniment will prevent aches and pains.

May Make Polar Trip

Graf Zeppelin Likely To Make Expedition Next Year

In addition to being groomed for a round-the-world trip this summer, the Graf Zeppelin is destined to show its silver sides to the white waste lands of the Arctic before another year has passed.

The International for the Exploration of the Arctic Regions by means of aircraft, has entered into a contract for the use of the big ship for an expedition from Leningrad to either Nome or Fairbanks by way of North Polar regions. The trip will take place in April or May of 1930.

Simple and Sure.—Dr. Thomas' Eucletic Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young and old.

The easiest way to judge some men is to discover how much they expect to be allowed on their old cars.

Every sower must one day reap from the seeds that he has sown.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 60 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE CRIMSON WEST

— BY —
ALEX. PHILIP

Published by Special Arrangement
With Thomas Allen, Publisher,
Toronto, Ont.

As dusk fell over lake and mountain, Donald returned from Wainwright's cabin. Andy glanced up expectantly as his friend appeared, but quickly averted his face as he saw Donald's features. Donald sank disconsolately to a seat outside the kitchen door. He had found Wainwright alone and wondered if Connie had purposely absented herself. Her treatment of him since her return puzzled him sorely and had filled him with a great despondency. As he rose and walked toward his cabin, Andy gazed after the retreating figure, eyes filled with compassion, then turned to speak to one of his helpers in such an irritable tone that the flunkey's mouth opened in astonishment.

For three evenings it was the same. Donald failed to find Connie at home; nor did she come to the mill. He regretfully decided that it was no coincidence, but that she was deliberately avoiding him.

On a Sunday afternoon Andy saw Donald gaze yearningly toward the bluff, then turn up the trail leading to the dam.

At Donald's request Gillis had diverted logging operations to circle the little oasis in the heavy timber, so that Connie's sylvan glade still held its primeval charm and beauty.

Donald stood for a moment gazing reflectively into the white foam at the foot of the tiny cataract, then threw himself on the soft bed of moss and closed his eyes. But this

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."—Evelyn Bourque, 132 Alma Street, Moncton, New Brunswick.

Lydia E. Pinkham's
Vegetable Compound

W. N. U. 1786

time the fairy spot did not bring the usual delicious languor to his harassed spirit. Birds sang as sweetly; flowers filled the air with the same odour; the wind sighed as softly through the tree-tops, and the small brook still sang its rippling song. The rapid tattoo of a woodpecker's bill on a hollow tree jarred his nerves and he tossed restlessly.

A cedar tip floated through the air. Blown by the wind, it fluttered in circles, then gently on the hands lying on his chest. His eyes opened, then, with trembling limbs, he came to his feet.

Connie, clad in faded overalls and cotton shirt, stood on the edge of the "nest." Her breast was heaving, her loosened golden hair flying in the wind. The softness in her blue eyes made Donald gasp, and his heart thumped as though it were in his throat.

"Connie!" he cried huskily, "I love you, dear! Don't you care for me a little?"

She sprang lightly to the ground and came toward him, her arms outstretched. Tears of joy coursed down her cheeks. "Oh, Donald, Donald, you big stupid!" she sobbed, "I have been waiting here for you every day. I—I have loved you always."

With a shock of incredible rapture Donald gathered her in his strong arms, where she cuddled like a weeping child. He kissed her red lips, her eyes, hair and throbbing throat. "My little Connie," he said, in a voice vibrant with feeling, "do you really love me?" He pressed his cheek to hers and felt the flutter of her long lashes as she pressed the softness of her own closer. The quick, exquisite indrawing of her sobbing breath were lovely answering things, and he thrilled to hear her whisper: "Yes, Donald! Yes, Donald!"

Andy came walking meditatively up the path, his hands clasped behind him, his blond head bowed in deep thought. Not finding Donald at the dam, he walked up the hill to enter the meadow just as Donald clasped Connie in his arms. For an instant the little Australian stood rigid, his eyes bulging, then retreated hastily to the shelter of the trees. Any one seeing Andy at that moment would have thought him suddenly gone mad. He whirled about in a wild dance, hugging himself in an ecstasy of joy. Ceasing his mad gyrations, he dashed his hand across his eyes and bolted like a runaway down the hill.

Gillis and his "redshirts" sat sunning themselves on the steps of the dining-room. They sprang to their feet as Andy came tearing down the hill. Breathlessly Andy told them of the scene he had witnessed. "We'll give them a blinkin' good reception when they come down," he panted. He issued several sharp orders and the men scurried happily to execute his commands.

The train that was to carry the excursionists to the Coast was being made up on the siding. While they were awaiting this, the visitors watched with curious interest the mysterious preparations being made by the loggers.

At this moment, hand in hand, Donald and Connie turned the corner of the building. As they did so they came to a sudden halt and stared at the odd scene before them. The men stood in two orderly rows. The ground between was carpeted with wildflowers, and each logger held a mass of blooms in his hand. At the far end of this lane of men stood

Andy, a wide smile on his droll face. Connie lowered her eyes in confusion. Donald shook his fist at Andy. "You little beggar! You are responsible for this."

Andy chuckled. "Come on, Donnie, be a sport," he coaxed.

With flushed faces Donald and Connie walked down the aisle, while the men pelted them with flowers. The crowd of visitors clapped their hands in appreciation of this beautiful scene. As they neared the end of the gauntlet, Andy sprang to a stump.

"Three cheers for the 'appy couple!" he yelled. A roar of cheering followed. "A tiger!" shouted Andy. And again the air trembled to the hoarse shout of brawny throats.

Donald led Connie straight to his mother. "Mother," he said bashfully, "meet your future daughter."

Quick tears came to his mother's eyes as Donald made this announcement. "My dear," she said tenderly, as her arms folded about Connie, "you are all love and tenderness."

The train's whistle screeched its warning and the crowd moved down to the station.

"Will you be coming home to us soon, Donnie?" asked his father as he was leaving. Donald looked down at Connie.

"We'll visit you on our honeymoon, Dad," responded Donald happily. He swept his arm toward the mountains. "I could never leave this. The spell of the Great West has entered my blood."

Janet had spent the afternoon paddling idly on the lake. When she received the news of Donald's engagement she concealed the ache in her heart by an outward air of indifference. The pretence of a headache enabled her to keep in her cabin and she did not appear for dinner. She wanted to be alone with her thoughts.

When the shadows lengthened, Donald and Connie moved slowly along the path toward the bluff. As they turned a curve in the trail Janet came to the window of her cabin and stood watching them until they disappeared from sight.

Andy, sitting a few feet distant with his back against a tree, noted the look of despondency on Janet's face. He came to his feet and walk-

ed slowly toward the kitchen. "As Methusalem said through 'is whiskers, 'e who 'olds 'is 'ead too 'igh will 't 'is blinkin' toe."

As the lovers were about to turn up the mountain trail, the trapper emerged from the woods with his old pack-horse. The cayuse was piled high with luggage.

"Where are you going, John?" queried Donald.

"I'm hittin' the trail, ol' timer." "I hope you are not leaving us," said Connie.

"Yes, I'm quittin' the country." "Why?" questioned Donald.

"Gettin' too thickly settled. I feel that I ain't got room to breathe. I'm goin' way back into the Cariboo somewhere so's I kin be by myself."

The race of mediaeval hermits is not dead. The spirit that led the first pioneers into the forest guides others there today. There are men whose souls long for a place untamed, who yearn to breathe the wild free air. They want a home straight from the hands of the Creator, unspoiled by man. They may be trappers, who brave cold and hardships to clothe milady in warm furs; they may be prospectors, who search out the hidden gold for others to use. Whatever they may be, these hardy men blaze the trail for others to follow.

When Donald told the trapper of the coming wedding the old man's eyes softened. "I'm glad. It's jest right. I hoped you two would git married." He shook hands gravely then clucked to his horse.

"Goodbye, Connie! Good-bye, ol' timer! God bless ye!" he shouted over his shoulder.

Donald and Connie stood watching the patient old figure as he trudged behind his cayuse. At a turn of the

trail he stopped and for a long interval gazed back at the log cabin by the stream, which had been his home for so many years. He waved his hand in farewell, then horse and man disappeared from view.

When Donald and Connie reached the bluff the sun had sunk in the crimson west, leaving a rich afterglow that spread across the horizon from west to east, the rich colours merging by slow degrees into that pure pearl-grey which makes the long and lovely twilight of the British Columbia mountains. Down on the lake mists were gathering, but in the upper sky and on the glaciers a vivid orange glow still lingered. The trees stood stiff and motionless in the quiet air. From afar, subdued but clear, came the hoot of a blue grouse, and from mountain gorges came the faint sighing sound of distant waterfalls. Sweet and pungent odours of wild flowers came from the woods about them. A star of silver brilliancy sparkled suddenly out in the sky over the massive snow-clad peaks.

"Venus," whispered Connie. Donald's gaze swept from the camp, nestled at their feet, to the darkening heavens, to the star of love, then down to the girl by his side.

There are moments in the lives of all men—regardless of creed or religion—when they feel the nearness of God. Such a moment came to Donald. He uttered no sound, yet his soul was crying out its great thankfulness.

Connie sensed his feeling. She bowed her head, her eyes misty with joy and gratitude. "Oh, God," she murmured softly, "we thank Thee for Thy many blessings."

THE END.

Riding abreast of the times

You expect more from your motor car today than you did ten years ago. And you get it. Greater speed, smoother power and more responsive performance are common to modern cars as a result of the development of higher speed, higher compression motors.

These improved engines demand a better oil—fuller-bodied, with greater resistance to heat and wear.

To ensure a better motor oil, Imperial Oil Limited goes all the way to Peru for the crude from which to make Marvelube. Marvelube is made from a base that is rich in all the qualities necessary for better lubrication of the modern motor. It is today the oil standard for high-speed motors from coast to coast.

Marvelube is preferred by over half a million motorists in Canada and is the choice of aircraft operators because of its superior lubricating qualities.

There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. Consult the Marvelube Chart at Imperial Oil stations and dealers.

Mountain View Notes

The Mountain View W. I. met in the community hall on Friday, May 17th. Miss A. Conroy of Edmonton lectured on "Infectious Diseases," which was very much enjoyed by the thirty five present. The June will be held in the hall on Thursday, June 20th. Mrs. Shiels convenor on Child Welfare and Public Health will have charge of the meeting, and Mesdames Mosby and Atkinson will act as hostesses.

A baby clinic will be held in the community hall on Friday, June 28th from 10 a. m. to 4 p. m. Everybody welcome to come and bring children up to six years of age.

The annual picnic of the Mountain View W. I. will be held at the community hall on Monday, July 1st.

Mrs. Garnet Tighe is the delegate from this W. I. to attend the convention in Edmonton next week.

There will be a dance in community hall on May 31st. Bellamy four piece orchestra.

Mr. Goldie Liesemer who has been attending University in Chicago returned to Didsbury this week.

Mr. and Mrs. H. Hawkes and Miss Vera Sexsmith and Mr. B. Robinson motored to the Calgary Power Dam at Ghost River on Sunday.

At the 17th annual convention of the Central Alberta District Women's Temperance Union, held at Wetaskiwin recently, the following officers were elected: Pres. Mrs. C. J. Russell, Innifail, vice-pres. Mrs. H. M. Reiber, Didsbury, cor.-secy. Mrs. J. I. Poole Wetaskiwin, rec.-secy. Mrs. (Rev) Armstrong, Olds, treas., Miss High Red Deer. An invitation for the next convention was tendered by the Bawlf union.

A little surprise packet, quite unusual, but thoroughly appreciated was received by us on Monday, in the nature of an invitation, containing a complimentary ticket from the secretary of the Crossfield baseball club to attend their first home game of the Rosebud league, which was played last night, with Olds. Such thoughtfulness can only originate from sportsmen of the genuine type.

Mr. Allen Hunsperger and son delivered a registered Black Poll bull (100%) to the Little Red Live Stock Association last week. Messrs. Hamilton and Jahnke represented the association. Mr. Hunsperger states that this animal was not to be compared with any like animal shown at the Calgary Stock Show last April.

Greatly increased interest in turkey raising as a profitable sideline to a general farming operations is reported throughout the province. Still further expansion is anticipated judging from the number of inquiries received by the poultry
